Absentee Ballot Fraud brought on mass voter disenfranchisement and suppression by doing the following in the 14th & 15th congressional and the 79th Assembly races:

"Ballot Harvesting"

This where campaigns take absentee ballot applications to the voter to fill out with the intent of having one of their team be the one that is signed off to bring back the actual ballot to the voter. The voter then fills out the ballot to vote for the individuals they want. Theoretically they can mail it and / or take it back to the board. However this allows for several scenarios of fraud which can be proven with the right amount of review, scrutiny, and subpoena to the voter who signed the absentee ballot application plus subpoena the individual who picked up their ballot for them. They must affirm that this process was done honestly.

Fraud scenarios:

Campaigns can forge signatures so that deceased people vote, immigrants vote, and people who have moved vote. In addition campaign will be found to have commit fraud when a voter they have issued absentee ballot application votes both by absentee ballot and votes at the poll site. The Bronx BOE must be subpoenaed so that they present cases of where a voter voted for one candidate by absentee ballot but then voted for a different candidate at the poll site. Plus records must be accessed for all the immigrants, deceased, and people who moved that voted. And campaign that is found out to have voter fraud must have their candidate disqualified from running in the primary !!

Thanks again...
