

I am a New Yorker who has been quarantined since the beginning of the pandemic as I have underlying health issues that make me specially vulnerable to covid19. The minute I heard that we could request absentee ballots on line I jumped to it. Weeks later I received an application in the mail, I completed it and mailed it out just in case, right? I never received my absentee ballot despite requesting it twice. Great is my disappointment as I find myself the day before the elections with the decision of risking my health to cast my ballot.
