

Hello,

Highly recommend creating greater awareness that the option of early in person voting is/was available. With all the publicity about absentee voting, the fact that in person early voting was available was not widely known. This would have avoided long waits & lines.

Despite two attempts at requesting absentee ballot only received day before 6/23 and i had voted early in person. Delay was not useful.

Also, information about the ballot should be publicized before the election so its not a surprise when voters go to vote, which also takes precious time.

Thanks for listening.
